

GJ Series Granulator

The GJ series granulator is a range of sound – proofed central granulators, ideal for centralised plastics recycling. These units are extremely easy to use, with good access to the blades for efficient cleaning and blade replacement. The staggered configuration of the blades are designed to grab hold and quickly start to reduce the waste. There are a wide range of granulators available in the series allowing versatility for numerous applications.

- Sound proof granulation zone ensures low operation noise.
- Blade configuration allows for efficient operation, easy maintenance and low dust generation.
- CE certified with several safety devices to meet EU safety standards.
- Phase controller protects the motor from damage by not allowing reverse rotating.
- Optional cyclone system enhances the units ability to extract dust from granulate.
- Complete closed loop system can be designed with other products in our range.

Simple to operate control panel.

Staggered blade configuration for maximum efficiency.

Easy access for maintenance and cleaning.

Technical Data

Model	Cutting Chamber (mm)	Crush Capacity (Kg/H)	Rotating/ Fixed Blade	Motor (kW)	Blower (HP)	External Dimensions (mm)	Weight (kg)
WSGJ230	230 x 215	100 - 150	6 / 2	4	5	1000 x 720 x 1490	500
WSGJ400	410 x 270	200 - 250	12 / 2	7.5	10	1180 x 930 x 1700	800
WSGJ500	520 x 320	300 - 350	15 / 2	11	15	1300 x 1060 x 1960	1100
WSGJ600	620 x 340	350 - 450	18 / 2	15	20	1360 x 1160 x 2130	1350
WSGJ800	815 x 480	450 - 600	24 / 4	22	30	1850 x 1540 x 2680	2250
