

**MOULDING.
PARTNERSHIPS.**

YOU, US & WORLD CLASS MACHINERY.

For over twenty-five years, we've been helping a broad range of moulders in the UK and EIRE achieve efficiency and value, with a personal service.

From our 12,000 sq ft workshop & showroom in Northamptonshire, we've supported those new to the plastics industry, right through to the largest moulders with a wide range of solutions.

Our capabilities include:

- New Yizumi machinery
- Refurbished injection moulding machines
- Full range of ancillaries
- Automation solutions
- On-site service & support

WHAT A TEAM.

As an independent specialist, we're able to apply our experience to support customers with an in-house engineering team, spare parts stock, showroom demonstrations and immediately available machinery.

Much more than just a machine distributor.

Collaborating with leading manufacturers from across the world allows us to offer a full range of solutions, from hopper loaders to bespoke automation. Our partnerships have been carefully selected over the years to ensure we deliver valuable solutions. Our relationships don't end with a machine sale, it's merely the introduction.

YIZUMI INJECTION MOULDING MACHINES

Since 2017, STV Machinery has been the sole UK and Ireland distributor for Yizumi.

Yizumi is a global giant in the design and manufacture of plastics machinery, with production sites spanning the globe and in excess of 850,000 sqm of manufacturing facilities.

YIZUMI

THINK TECH FORWARD

Some highlights:

- Moulding machines from 15T – 8500T clamp force
- European components with KEBA control systems
- UK, EU and Chinese stock of spares
- In-house Yizumi trained engineers
- Sales, service, warranty and spares all handled by STV Machinery

Yizumi FF Series Hybrid / All electric, 15T – 1380T

Yizumi A6-EU Series Toggle lock, 30T – 700T

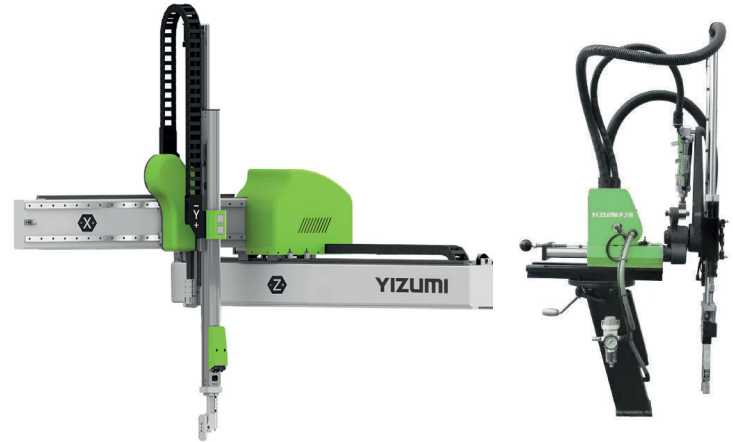

Yizumi D1 Series Two platen direct lock, up to 4000T

Yizumi VM Series Vertical machine, up to 3000T

YIZUMI ROBOTS

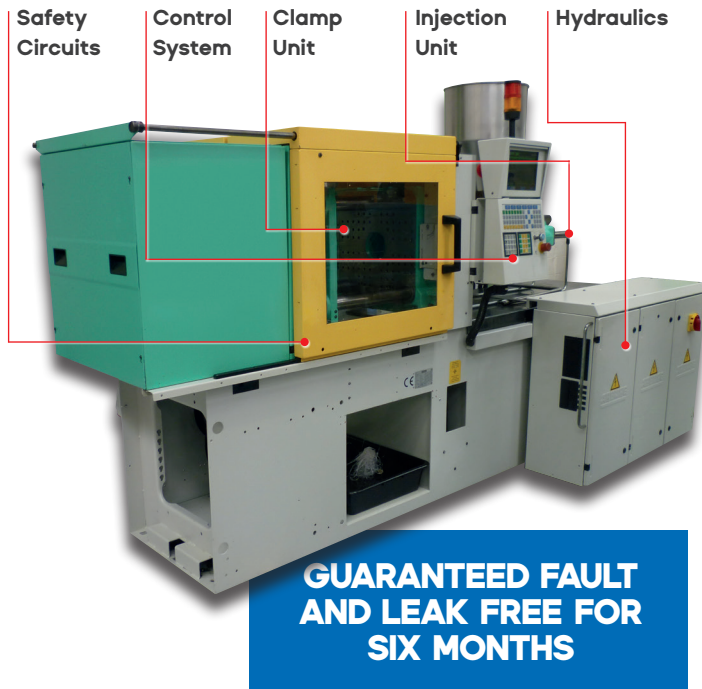

The range of high quality and easy-to-use Yizumi robots suit a wide range of applications. From sprue pickers to beam robots with full end-of-arm tooling solutions, we have it covered.

- Pneumatic sprue pickers suitable for machines up to 150T.
- A huge choice of beam robots covering options for high accuracy, high speed and/or high payload.

REFURBISHED MACHINES

We offer refurbished machines from the leading quality manufacturers of plastics processing machinery.

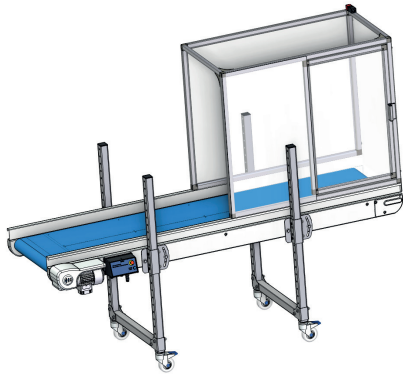

- We offer high quality used machines, professionally refurbished by our in-house engineers and backed with a robust warranty.
- Every machine undergoes a rigorous and fully documented refurbishment process, making it the next best thing to a brand-new machine.
- With an average of 150 hours going into each refurbishment, all hydraulic and electrical systems of the machine are fully inspected. Once over 100 checks are completed, the machine is given a full cosmetic work up and run for at least 5000 cycles with a mould.
- So when that machine goes on sale, we can say, hand on heart, that it's as close to new condition as practically possible... and our customers often see for themselves on site.
- Check out our website for all currently available machines, listed with prices.

VIRGINIO NASTRI AUTOMATION

Virginio Nastri is one of Europe's leading and best-known manufacturers of conveyors.

We offer the full range of Virginio Nastri solutions to the UK market, with stock units and spare parts holding.

As well as standard line conveyors, Virginio offer box sorters, separators and loading solutions which we can fully customise to suit any project.

Complete solutions to suit any production cell

ANCILLARY EQUIPMENT

We hold a wide range of proven ancillary equipment in stock, all backed by a warranty, spares and technical support to ensure longevity and reliability.

The line-up includes:

- Chillers
- Desiccant Dryers
- Hot Air Dryers
- Hopper Loaders
- Colour Dosers
- Granulators
- Mould Heaters
- Material Storage

SPARES - NEW & USED

We hold comprehensive stocks of new and used spare parts for machines and ancillaries from most of the leading manufacturers, as well as the brands we supply and support.

- Proportional Valves
- Control Cards
- Legacy Parts
- Consumable Parts
- Plasticising Units
- Control Systems

SERVICING, CALIBRATION & TRAINING

With our experienced team of trained engineers, we can also carry out machine maintenance and repairs at customer premises, either on annual or ad hoc basis.

- Machine servicing, refurbishment, diagnostics and upgrades
- Quality and condition monitoring
- Machinery operation & guidance
- Recommissioning and decommissioning
- Platen restoration

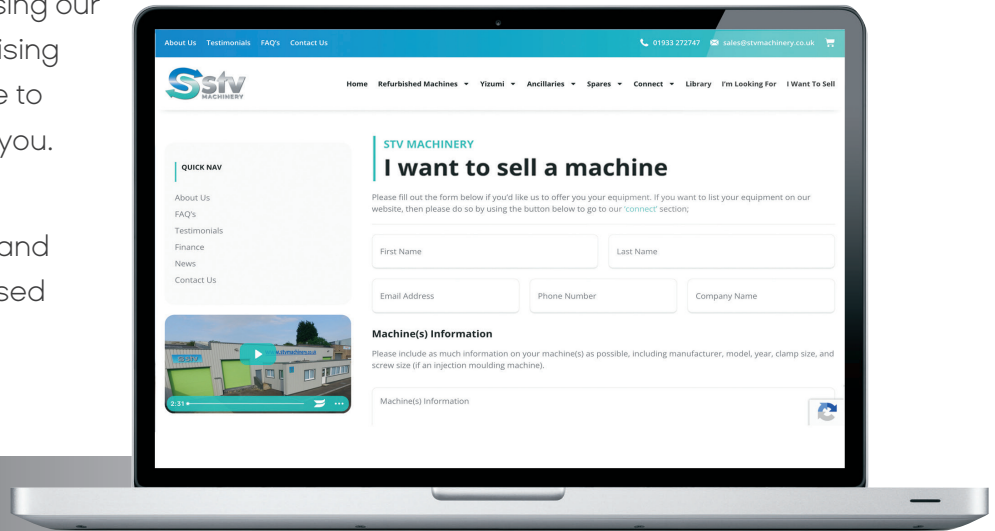

LOOKING TO SELL?

If you're planning a production upgrade, or simply want to sell or part-exchange a machine, STV Machinery can offer you a **trusted and cost-effective solution.**

By purchasing for our own stock, using our extensive dealer network or advertising directly on our website with our free to use 'connect' service, we can help you.

Moulders around the world use our website as a source of information and to browse through both new and used equipment.
